

# CARTRIDGE TANK<sup>®</sup> FILTRATION SYSTEM

Say goodbye to small and inefficient housings. Get rid of expensive stainless steel housings. The ENPRESS **Cartridge Tank<sup>®</sup>** is a direct replacement for small and inefficient 2½" or 4½" housings, or expensive Stainless Steel cartridge housings, and offers extended service and life, and a more cost-effective and efficient filtration solution.

Utilizing ENPRESS' patented industry exclusive liner design and no tools necessary snap-ring design; Full radial seal top and bottom caps make replacement simple. **Cartridge Tank<sup>®</sup>** makes it easy to access and remove the internal filtration solution.

Lightweight and cost effective with multiple configuration options, from high flow commercial/industrial applications to stand-alone residential Point-of-Entry (POE) installations for city and well water applications, this is the filtration solution of the future...100% non-metallic! The **Cartridge Tank<sup>®</sup>** is a high performance, NSF 42 listed device and has been tested to 100 psi operating pressure with 4:1 Burst Safety Factor.

## Features

100% non-metallic!

Patented no-tools necessary snap-ring design

Multiple filtration solutions

Full 1¼" and 2" plumbing connection options

Large capacity filter configurations

## Benefits

Lightweight and cost effective housing with high chemical compatibility

Simple and easy change-out of cartridges. No Tools, Means NO TOOLS!

Match the filtration solution with flow rate requirements

Extended service life, contaminant removal, and dirt holding capacity

Low pressure drop = high flow

## Applications

Ideal for Residential, Food Service, Rental Fleets, Commercial and Industrial Applications

Make-up Water, RO Pre-filtration, Cooling Towers, Chill Water Loops, Metal Finishing

Process Water (turbidity, particulate, colloidal suspensions)

Reduction of unwanted bad taste and odor from potable drinking water

City water applications where water softeners are a hard sell...as a replacement option of pitcher, faucet, bottled water and/or refrigerator filters

Reduction in frequency of replacing common 2½" or 4½" housings...Bigger is Better

Other water-based fluid solutions

Available in 5 standard colors.  
Custom colors available upon request.

## Technical Schematics

### Recommended:

Drain installed on inlet side of system, for removal of contaminants in sediment applications.

Drain installed on outlet side of system, for flushing of new cartridges that have dust (i.e. Blue Series)

## Available Options and Configurations

COLOR-CODED CARTRIDGE FILTRATION SERIES

ONE® is an ENPRESS Filtration Technology

ELLC #002 - 03/2013

# CARTRIDGE TANK® FILTRATION SYSTEM

The Blue Filtration Series incorporates surface modified carbon block filter technology that is highly effective reducing bad taste, odor, and the reduction of chlorine and chloramines from potable drinking water. The filters are made using high performance coconut shell carbon, which has more micropores compared to other types of carbon.

Coupled with a unique binder system, these carbon block filters deliver a product with superior adsorption capacity and kinetic dynamics. The unique high capacity filters provide cost effective water filtration solutions in a size and configuration that offer ease-of-use, extended service life and high capacity, with a low pressure loss.

## Blue Filtration Series

The Chloramine Block is a proprietary media with an enormous number of catalytically active Nitrogen Groups for highly efficient reduction of chloramines. This enhanced catalytic functionality has FIVE times more capacity for chloramines reduction than standard carbon blocks.

All components and materials are made with FDA approved materials, and Manufactured from NSF 61 Certified Coconut Shell carbon, and are California Prop 65 Compliant. Each filter comes with a unique handle designed top cap for lightweight and easy removal, a bag for proper disposal, and a double o-ring bottom connection into the **Cartridge Tank®** plumbing adapter for the 2½" assembly and full 1¼" PVC glue socket flow rate connections.

### Available in three filter configurations:

**CT-03-CB:** 3 Micron Carbon Block, High Capacity

**CT-20-CB:** 20 Micron Carbon Block, High Porosity/  
Low Pressure Drop

**CT-03-CB-AMINE:** 3 Micron Carbon Block,  
Chloramine Reduction

### Features

- High-performance carbon
- Unique binder system
- Proprietary manufacturing process
- Outer Wrap of Polypropylene
- Netting of Polyethylene

### Benefits

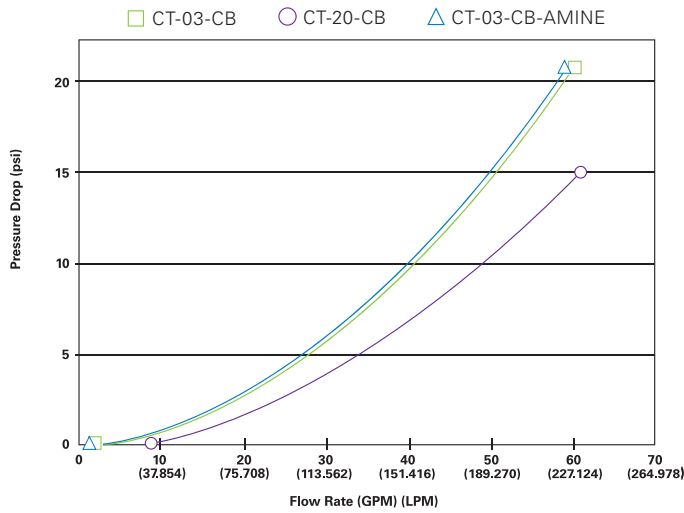

- Exceptionally low pressure drop
- High dirt holding capacity
- Excellent contaminant reductions

### Applications

- Ideal for Residential, Food Service, Commercial and Industrial applications
- Effective at reducing unwanted bad taste and odor, along with chlorine and chloramine taste and odor from potable drinking water
- Ideal as polishing or pre-filters in applications requiring fine filtration and high capacity

### Filter Performance

The Yellow Filtration Series are dual gradient double pleated filtration solutions for extended life and use, with filtration levels of 5 and 20 microns. This Series offers a combination filter composed of an outer layer of Polypropylene String with a Melt blown Polypropylene core. The precise wound pattern provides greater surface area, higher dirt-loading capacity and greater efficiency than standard wound filter cartridges. As a dual media filter, they provide a cost effective, extended-life product capable of capturing a broad range of particulates with high service flow rates greater than 30+gpm with less than 15 Delta P.

## Yellow Filtration Series

### Features

- Outer pre-filter manufactured using 100% polypropylene yarn
- Precision pattern captures 20 or 50 microns or larger
- Extends service life of inner filter
- Outer filter captures fine sediment, sand, silt, rust and scale particles
- Melt blown inner filter manufactured using thermally bonded polypropylene fibers
- Minimal pressure drop
- Consistent downstream flow w/out fiber migration

### Benefits

- Microorganism resistant
- NSF component
- Nominally rated as stated
- High purity
- Excellent chemical resistance
- High dirt holding capacity
- Graded density

The large diameter pre-filter reduces particulate loading on the post filter allowing it to perform at higher velocities, capturing fine sediment, sand, silt, rust and scale particles of 50 or 20 microns. This equates to higher particulate reduction and added loading capacity.

The Meltblown core captures 20 or 5 micron particles, (depending on the filter configuration), this dual combination filter extends the life of the inner-cartridge by eliminating premature caking and prevents down stream media migration common in string cartridges.

Each filter comes with a unique handle designed top cap for lightweight and easy removal, a bag for proper disposal, and a double o-ring bottom connection into the **Cartridge Tank**<sup>®</sup> plumbing adapter for the 2½" assembly and full 1¼" PVC glue socket flow rate connections.

### Available in two filter configurations:

**CT-2005-SWMB:** External 20 Micron String Wound pre-filter, with 5 Micron Meltblown Core

**CT-5020-SWMB:** External 50 Micron String Wound pre-filter, with 20 Micron Meltblown Core

### Applications

Potable water	Food/beverage
Pre RO	Fine chemicals
Electronics	Metal finishing
Plating solutions	Oxidizing agents
Corrosive fluids	Gases
Concentrated acids and alkali	

### Filter Performance

### Yellow Series Configuration

<p>Item #: CT-1/4NPTLID</p>  <p>Top Cap option with pressure release Valve &amp; Removal Handles</p>	<p>Item #: CT-2.5LID</p>  <p>2.5" Threaded top/bottom Res./LC Cap threaded connection.</p>
<p>Item #: CT-RETAININGRING</p>  <p>Snap Ring with I.D. Tag connection.</p>	<p>Item #: CT-2.5DRAIN CT-2.5ADAPTER</p>  <p>2.5" Bottom Drain Plumbing for Res./LC Filters.</p>

### Better Filtration - There's No Competition

**Extended service life:** 6, 12, 18, or 24 months versus 1-3 months, with 3x media content and 2x surface area to less efficient options!

**2x Surface area:** Wound in a precise pattern, providing greater surface area, higher dirt-loading capacity, and greater efficiency than that of a standard wound cartridge. The precise pattern offers 30-50% improved efficiency. ENPRESS surface area: = 566.46 sq. inches. Standard 4.5x20 = 283.23 sq. inches. = Two times the surface area.

**3x Media Content:** Both the ENPRESS 50x20 & 20x5 filters have a finished medium weight of 9 pounds, with a yarn content of 7.75 pounds. A standard 4.5x20 cartridge has a medium string weight of 2.5 pounds = Three times the media content.

# CARTRIDGE TANK<sup>®</sup> FILTRATION SYSTEM

The Green Filtration Series are electropositively charged dual gradient double pleated filtration solutions that successfully remove contaminants from 1 to 0.2 microns, featuring ENPRESS NanoAI™ media. The filters are designed with a larger 20 micron pre-filtration layer externally and the charged media internally, extending filtration level contamination and service life, while achieving high flow and low pressure drop.

The filters will outperform competitive filtration solutions in all turbidity applications including insoluble scale, Fe<sub>3</sub>, bacterial iron slime, colloidal solids, silt, rust, and other particle filtration, resulting in higher water quality and longer life of the filtration system.

## Green Filtration Series

The Green Series of pleated filters features a thermally bonded blend of micro-glass fibers & cellulose, infused with nanoalumina fibers in a non-woven matrix that creates an electropositively charged depth filter media. When assembled into a pleated cartridge, our solution offers a unique combination of efficiency, capacity, flow rate, & low pressure drop that allow this nonwoven media to filter like a NF polymeric membrane, at levels unmatched in today's filtration marketplace. All filters feature the use of Agion® antimicrobial technology that provides built-in protection by working 24/7 resisting the growth of microbes.

Each filter comes with a unique handle designed top cap for lightweight and easy removal, a bag for proper disposal, and a double o-ring bottom connection into the **Cartridge Tank<sup>®</sup>** plumbing adapter for the 2½" assembly and full 1¼" PVC glue socket flow rate connections.

### Available in two filter configurations:

**CT-20xNanoAI™-AG:** External 20 Micron Pleated pre-filter, with NanoAI™ Pleated Inner Filter w/ Agion® Biostat

**CT-20xNanoAI™-PAC-AG:** External 20 Micron Pleated pre-filter, with NanoAI™ PAC Pleated Inner Filter w/Agion® Biostat and Carbon Block Core

is a trademark of Sciescent LLC, Wakefield, MA, USA

## Features

- Dual Gradient Double Pleated Filters with electropositively charged NanoAI™ media
- Double Buna-N O-ring seals
- Filter Belly Bands
- PAC solution option
- Agion® antimicrobial technology

## Benefits

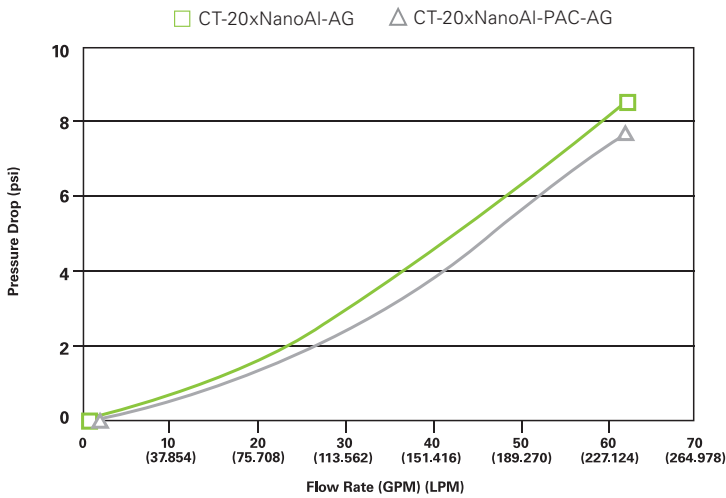

- Successfully remove contaminants from 1 to 0.2 microns
- Over traditional filtration include finer particle retention, higher flow rate and loading capacity, and lower pressure drop
- Ensures no bypass of contaminants and high chemical compatibility
- Prevent collapsing of filters under high flow or contaminant load applications
- Effective at reducing unwanted bad taste and odor from potable drinking water
- Provides built-in protection by working 24/7 resisting the growth of microbes

## Applications

- Primary Filtration in lieu of microporous membranes
- Make Up Water (particulate, microbial control)
- Polishing Filters (carbon fines, emulsified oil removal)
- RO Prefiltration (SDI reduction)
- Process Water (turbidity, particulate, colloidal suspensions)
- Waste Water (biologicals, proteins, dyes)
- Cooling Towers, Chill Water Loops (iron removal)

### Filter Performance

<p>Item #: CT-RETAININGRING</p> <p>Snap Ring with I.D. Tag connection.</p>	<p>Item #: CT-2.5DRAIN CT-2.5ADAPTER</p> <p>2.5" Bottom Drain Plumbing for Res./LC Filters.</p>

### Better Filtration - There's No Competition

**Known foulants for RO membranes** that are reduced by this adsorptive technology: Virus, bacteria, colloids (Iron, Manganese, Silica, etc), Cellular debris is also reduced: Lipids (hydrophobic and hydrophylic), Phospholipid, Proteins, Carbohydrates, and Glucose – mono and poly saccharides (TEP/EPS)

**Data suggests adsorptive filter media** could represent a significant improvement to membrane performance, life and overall operating cost by reducing fouling.

**Additional filtration highlights include:** Removal of Humic Acid based tannins; 3-4 log reduction, cyst removal; Endotoxin removal; Selected Heavy Metal Removal: Fe<sub>2</sub>, Fe<sub>3</sub>, Sn, Cu, Cr<sub>3</sub>, Al; Reduces Membrane fouling; Pre-, Post-, and Stand-Alone Filtration Solution

The Orange Filtration Series are dual gradient double pleated filtration solutions for extended life and use, with filtration levels of 5, 10 and 20 microns. The filters are designed with a larger pre-filtration layer externally and the smaller internally, extending filtration level contamination and service life, while achieving high flow and low pressure drop.

## Orange Filtration Series

The filters will outperform competitive filtration solutions in all turbidity applications including silt, rust, and other particle filtration. The Orange Series also provides lower shear water velocity as the raw water passes through the filter, allowing for more contact time and interaction with the extensive surface area of the filters. This results in higher water quality and longer life of the filtration system.

Each filter comes with a unique handle designed top cap for lightweight and easy removal, a bag for proper disposal, and a double o-ring bottom connection into the **Cartridge Tank**<sup>®</sup> plumbing adapter for the 2½" assembly and full 1¼" PVC glue socket flow rate connections.

### Available in three filter configurations:

**CT-10x5:** External 10 Micron Pleated pre-filter, with 5 Micron Pleated Internal Filter

**CT-20x10:** External 20 Micron Pleated pre-filter, with 10 Micron Pleated Internal Filter

**CT-50x20:** External 50 Micron Pleated pre-filter, with 20 Micron Pleated Internal Filter

## Features

Dual Gradient Double Pleated Filters

Double Buna-N O-ring seals

Filter Belly Bands

Durable Polyester filter and Polypropylene cap construction

## Benefits

Extended service life, contaminant removal, and dirt holding capacity

Low pressure drop = high flow!

Ensures no bypass of contaminants and high chemical compatibility

Prevent collapsing of filters under high flow or contaminant load applications

Bacteria and chemical resistant

## Applications

# CARTRIDGE TANK® FILTRATION SYSTEM

The White Filtration Series is a unique and high capacity granular media bottle that allows incorporation of multiple media options and solutions to be used with the series. This filter series is a 0.5 ft<sup>3</sup> empty bottle for filling of granular filtration media. This ONE - Water Filtration Simplified™ filter series is ideal for a wide range of Residential, Food Service, Commercial, and Industrial applications, and can be used for multiple applications from Service DI, POE for city or well-water installations, Rental Programs, Exchange systems, high-purity pre- or post-filtration applications, etc...the options, configurations, and solutions are endless.

The design also incorporates the patented Vortech® full distributor plate technology, providing uniform distribution and utilization of the media bed along with maximum efficiencies and service flow rates, giving system design maximum flexibility whether installed in up-flow or down-flow service. A removable Top Cap has a locking feature that can be used for limiting access to the internal medias by the end-user, and special Rings on the bottom of the bottle allow for ease of hanging of the cartridge for easy change-out of medias in applications like Service DI Exchange.

The White Series is also available in a Mid-Vortech® configuration that splits the cartridge chambers equally, to 0.25 ft<sup>3</sup> per chamber, for separation and use of different medias of which increases the efficiency and usage of the media bed.

Each filter comes with a unique handle designed top cap for lightweight and easy removal, and a double o-ring bottom connection into the **Cartridge Tank®** plumbing adapter for the 2 ½" assembly and full 1" PVC glue socket flow rate connections.

#### Available in two filter configurations:

**CT-MEDIA05** – Full 0.5 ft<sup>3</sup> configuration, able to be filled with any media for up-flow or down-flow service due to use of Vortech® technology.

**CT-MEDIA05-MID** – Full 0.5 ft<sup>3</sup> configuration with Mid-Vortech® separation plate, able to be filled with any media for up-flow or down-flow service, due to use of Vortech® technology.

## White Filtration Series

### Features

- 0.5 cuft empty media bottle
- Polyethylene construction
- Vortech® distributor plate
- Locking or Removable top cap
- Rings on bottom of bottle
- Double Buna-N O-ring seals
- Mid-Vortech® distributor plate option

### Benefits

- Extended service life and high capacity contaminant removal
- High chemical resistance
- Low pressure drop=high flow!
- Up-flow or down-flow service and full utilization of the media bed
- Ease of handling
- Ensures no bypass of contaminants and high chemical compatibility
- Separation of multi-media configurations.

### Applications

- Ideal for Residential, Food/Beverage Service, Rental Fleets, Service DI Exchange, Plating solutions, Commercial and Industrial Applications
- Metal finishing, Oxidizing agents, Corrosive fluids, Electronics, Pre-RO, Process Water, Waste Water, Cooling Towers, Make-up Water, Polishing Filters, Primary Filtration
- Effective at reducing unwanted bad taste and odor, along with chlorine and chloramine taste and odor from potable drinking water

## Filter Performance

**ONE™ simplifies the filtration process and offers a variety of options to suit your needs. The Purple and Red Filtration Series offer:**

Higher water quality and longer life of the filtration system, due to a lower shear water velocity as the raw water passes through the filter, to allow for more contact time and more interaction with the extensive surface area of the filters.

Each filter comes with a unique handle designed top cap for lightweight and easy removal, and a bag for proper disposal, along with a double o-ring bottom connection into the ENPRESS Cartridge Tank™ plumbing adapter for the 4.5" plumbing connections and 2" pipe size flow rates.

Specifications	
Maximum flow rate (Pleated)	150 GPM* (34 M3/hr.)
Max. flow rate (1 Micron Absolute)	50 GPM (11.3 M3/hr.)
Max. flow rate (Depth)	100 GPM (22.7 M3/hr.)
Max. flow rate (Activated Carbon)	15 GPM (3.4 M3/hr.)
Cartridge end caps	Glass reinforced PP
O-rings (cartridge)	EPDM

CARTRIDGE TANK™ FILTRATION SYSTEM

### Purple Filtration Series

The Meltblown Polypropylene Depth, also known as the **Purple Filtration Series**, are ideal for reduction of soft particulate and high service flow rates up to 100gpm.

**ONE™** Purple and Red Filtration Series are tough, durable and designed for a variety of residential and commercial uses, including:

#### Common Applications:

- Whole house filtration
- Commercial filtration
- Industrial filtration
- Pre-filtration for reverse osmosis equipment
- Community water systems
- Sea water applications due to their non-corrosive construction
- Replacement for bag filters with more filter area
- A convenient alternative to multiple cartridge filters
- Water for livestock and poultry

#### 2 filter configurations:

- 5 micron
- 20 micron filtration levels

	Purple	Red	Red
Media	PP or PE	PP or PE	Activated carbon
End caps	PP + FG	PP	PP + FG
Center tubes	PP	PP	PP
Maximum flow rate GPM (M <sup>3</sup> /hr)	150 (34)	100 (23)	15 (7.4)

Carton dimensions	7" x 7" x 31"	7" x 7" x 31"	7" x 7" x 31"
Micron ratings	1A, 5* 20**	5, 20	5

\*Polypropylene fabric \*\*Polyester fabric  
Note: Flow rates are based on each specific application, micron rating, solids content and a number of other factors. End user should consider these factors when selecting the filter housing (or number of filter housings) needed for their particular requirement.

**ONE™ simplifies the filtration process and offers a variety of options to suit your needs.**

The **Red Filtration Series** are pleated Polypropylene cartridges, with multiple levels of filtration flexibility:

The PAC cartridge is for a service flow rate of 15gpm with a removal capacity of 140,000 gallons, with a 90% chlorine reduction. This dramatically improves the quality of water by reducing chlorine, bad tastes, foul odors and sediment.

The pleated cartridges are for service flow rates up to 150gpm, with low pressure drop of less than 15psi, are 100% cellulose free media, and cleanable 5 micron and up.

**Red Filtration Series**

Install **ONE™** filters in parallel to achieve higher flow rates or in a series for step filtration, allowing various micron ratings in each Cartridge Tank. This makes ONE filters an attractive option for those applications that require versatility.

**4 filter configurations:**

- 20 micron
- 5 micron
- 1 micron absolute
- Activated Carbon (PAC) impregnated cartridge.

**Low Pressure Drop**

**ONE™** filters are designed to minimize pressure drop by using 2" pipe fittings and large diameter center tubes. (see chart for pressure drop data using pleated cartridges)

**Installation and Replacement:**

The ONE Cartridge Tank Filtration System is designed to be simple and easy to install and service. In combination with our patent pending no tools necessary snap-ring design and Cartridge Tank solution, ONE filtration makes easy look easy.
