SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Product form: Substance
Trade name: FloMag® PWT 12 x 40
FloMag® PWT 6 x 16
FloMag® PWT Prilled 30
Chemical name: Magnesium oxide
CAS No: 1309-48-4
Formula: MgO
Other means of identification: calcined brucite magnesia, calcined magnesia, calcined magnesite, magnesite burnt deadburned refractory, periclase, sea-water magnesia, oxomagnesia

1.2. Relevant identified uses of the substance or mixture and uses advised against

Use of the substance/mixture: For use in potable water treatment (NSF Standard 60 for Drinking Water Chemicals).

1.3. Details of the supplier of the safety data sheet

Martin Marietta Magnesia Specialties
1800 Eastlake Road
Manistee, Michigan 49660, USA
Tel: +001 410 780 5500

1.4. Emergency telephone number

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

Classification (GHS-US)
Not classified

2.2. Label elements

GHS-US labeling
No labeling applicable

2.3. Other hazards

No additional information available

2.4. Unknown acute toxicity (GHS-US)

None

SECTION 3: Composition/information on ingredients

3.1. Substances

Substance type: Mono-constituent
Name: FloMag® PWT (Potable Water Treatment) Magnesium Oxide
CAS No: 1309-48-4

<table>
<thead>
<tr>
<th>Name</th>
<th>Product identifier</th>
<th>%</th>
<th>Classification (GHS-US)</th>
</tr>
</thead>
<tbody>

3.2. Mixtures

Not applicable

SECTION 4: First aid measures

4.1. Description of first aid measures

First-aid measures general: Never give anything by mouth to an unconscious person. If you feel unwell, seek medical advice (show the label where possible).

First-aid measures after inhalation: If breathing is difficult, remove to fresh air and keep at rest in a position comfortable for breathing.
**FloMag® PWT (Potable Water Treatment) Magnesium Oxide**  
Safety Data Sheet  
according to Federal Register / Vol. 77, No. 58 / Monday, March 26, 2012 / Rules and Regulations

| First-aid measures after skin contact | Remove affected clothing and wash all exposed skin area with mild soap and water, followed by warm water rinse. |
| First-aid measures after eye contact  | Rinse immediately with plenty of water. Obtain medical attention if pain, blinking or redness persist. |
| First-aid measures after ingestion   | Rinse mouth. Do NOT induce vomiting. Obtain emergency medical attention. |

4. **Most important symptoms and effects, both acute and delayed**

<table>
<thead>
<tr>
<th>Symptoms/injuries</th>
<th>Not expected to present a significant hazard under anticipated conditions of normal use. Do not breathe dust.</th>

</tbody>
</table>

**SECTION 6: Accidental release measures**

6.1. **Personal precautions, protective equipment and emergency procedures**

General measures : Avoid creating or spreading dust. Dust deposited may be vacuum cleaned.

6.1.1. **For non-emergency personnel**

| Protective equipment | Where excessive dust may result, use approved respiratory protection equipment. |
| Emergency procedures  | Evacuate unnecessary personnel.                                              |

6.1.2. **For emergency responders**

| Protective equipment | Where excessive dust may result, use approved respiratory protection equipment. |
| Emergency procedures  | Ventilate area. If a major spill occurs, all personnel should be immediately evacuated and the area ventilated. |

6.2. **Environmental precautions**

Prevent entry to sewers and public waters. Notify authorities if liquid enters sewers or public waters.

6.3. **Methods and material for containment and cleaning up**

For containment : Do not allow minor leaks or spills to accumulate on walking surfaces. Contain and collect as any solid.

Methods for cleaning up : On land, sweep or shovel into suitable containers. Minimize generation of dust.

6.4. **Reference to other sections**

See Heading 8. Exposure controls and personal protection.

**SECTION 7: Handling and storage**

7.1. **Precautions for safe handling**

| Precautions for safe handling | Wash hands and other exposed areas with mild soap and water before eating, drinking or smoking and when leaving work. Provide good ventilation in process area to prevent formation of dust. |

04/18/2014 EN (English US) SDS ID: MM_1300012 2/7
Hygiene measures: Smoking, eating and drinking should be prohibited in areas of storage and use. Always wash your hands immediately after handling this product, and once again before leaving the workplace.

7.2. Conditions for safe storage, including any incompatibilities

Storage conditions: Keep only in the original container in a cool, well ventilated place away from incompatible materials. Keep container closed when not in use.

Incompatible materials:
- ACID (Strong) - vigorous reaction, heat generated; Chlorine Trifluoride reacts violently, producing flame; Phosphorous Pentachloride - incandesces brilliantly. NOTE: Exposure to water may cause this product to slowly hydrate, during which heat may be generated (exothermic reaction).

7.3. Specific end use(s)

Reference Section 1.2

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

For components listed in Section 3.1, all available OELs are displayed

<table>
<thead>
<tr>

</tr>
</thead>
<tbody>
<tr>
<td>USA ACGIH</td>
</tr>
<tr>
<td>USA ACGIH</td>
</tr>
<tr>
<td>USA OSHA</td>
</tr>
</tbody>
</table>

8.2. Exposure controls

Appropriate engineering controls: Avoid dispersal of dust in the air (i.e., clearing dust surfaces with compressed air). Provide local exhaust ventilation of closed transfer systems to minimize exposures.

Hand protection: Wear protective gloves: dust impervious gloves.

Eye protection: Chemical goggles or safety glasses.

Respiratory protection: In case of insufficient ventilation, wear suitable respiratory equipment.; Use air-purifying respirator equipped with particulate filtering cartridges.
- UP TO 100 MG/M³: Any dust, mist or fume respirator; any air supplied respirator; or, self-contained breathing apparatus.
- UP TO 250 MG/M³: Any supplied air respirator operated in a continuous flow mode or any powered air purifying respirator with a dust/mist/fume filter.
- UP TO 500 MG/M³: High efficiency particulate filter with full face piece; any powered air supplied respirator with a tight fitting face piece and a high efficiency particulate filter; any self-contained breathing apparatus with a full face piece; any supplied air respirator with a full face piece.
- UP TO 7500 MG/M³: Any air supplied respirator with full face piece and operated in a pressure demand or other positive pressure mode.

EMERGENCY or ENTRY INTO UNKNOWN CONCENTRATIONS: Self-contained breathing apparatus with full face piece and operated in pressure demand mode or air supplied respirator with full face piece operated in a pressure demand or other positive pressure mode in combination with auxiliary self-contained breathing apparatus operated in pressure demand or positive pressure mode.

ESCAPE: Any air purifying full face piece respirator with high efficiency particulate filter or any appropriate escape type self-contained apparatus.

OTHER INFORMATION: When using, do not eat, drink or smoke.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Physical state: Solid
Appearance: Powder.
Molecular mass: 40.3 g/mol
Color: white.
Odor: Odorless.
Odor threshold: No data available
pH: No data available
pH solution: 10.3 saturated aqueous solution
Relative evaporation rate (butyl acetate=1): No data available
Melting point: 2827 (2797 - 2857) °C
Freezing point: No data available
Boiling point: 3600 °C
Flash point: Product does not sustain combustion
FloMag® PWT (Potable Water Treatment) Magnesium Oxide
Safety Data Sheet
according to Federal Register / Vol. 77, No. 58 / Monday, March 26, 2012 / Rules and Regulations

Self ignition temperature : No data available
Decomposition temperature : > 1700 °C
Flammability (solid, gas) : No data available
Vapor pressure : No data available
Vapor pressure at 50 °C : 0 hPa
Relative vapor density at 20 °C : 0
Relative density : No data available
Density : 3.58 g/cm³
Solubility : In water, material is partially soluble.
Log Pow : No data available
Log Kow : No data available
Viscosity, kinematic : No data available
Viscosity, dynamic : No data available
Explosive properties : Product is not explosive.
Explosive limits : No data available

9.2. Other information
No additional information available

SECTION 10: Stability and reactivity

10.1. Reactivity
Reacts with: Incompatible materials.

10.2. Chemical stability
Stable at ambient temperature and under normal conditions of use.

10.3. Possibility of hazardous reactions
Hazardous polymerization will not occur.

10.4. Conditions to avoid
Avoid contact with incompatible materials, excessive heat or cold; moisture.

10.5. Incompatible materials
ACID (Strong) - vigorous reaction, heat generated; Chlorine Trifluoride reacts violently, producing flame; Phosphorous Pentachloride - incandesces brilliantly. NOTE: Exposure to water may cause this product to slowly hydrate, during which heat may be generated (exothermic reaction).

10.6. Hazardous decomposition products
If magnesium oxide is heated to the point of volatilization (i.e., >1700 °C), magnesium oxide fumes may be generated.

SECTION 11: Toxicological information

11.1. Information on toxicological effects
Acute toxicity : Not classified. (Based on available data, the classification criteria are not met)
Magnesium oxide (1309-48-4)
LD50 oral rat 3990 mg/kg
ATE (oral) 3990.000 mg/kg body weight
Skin corrosion/irritation : Not classified. (Based on available data, the classification criteria are not met)
Serious eye damage/irritation : Not classified. (Based on available data, the classification criteria are not met)
Respiratory or skin sensitization : Not classified. (Based on available data, the classification criteria are not met)
Germ cell mutagenicity : Not classified. (Based on available data, the classification criteria are not met)
Carcinogenicity : Not classified. (Based on available data, the classification criteria are not met)

Magnesium oxide (1309-48-4)
IARC group Not listed in carcinogenicity class
National Toxicology Program (NTP) Status Not listed in carcinogenicity class
Reproductive toxicity : Not classified. (Based on available data, the classification criteria are not met)
Specific target organ toxicity (single exposure) : Not classified. (Based on available data, the classification criteria are not met)
Specific target organ toxicity (repeated exposure) : Not classified. (Based on available data, the classification criteria are not met)
FloMag® PWT (Potable Water Treatment) Magnesium Oxide
Safety Data Sheet

### Potential Adverse human health effects and symptoms

- **Symptoms/injuries after inhalation**: Inhalation may cause: irritation, cough, shortness of breath.
- **Symptoms/injuries after skin contact**: Effects of skin contact may include: skin irritation.
- **Symptoms/injuries after eye contact**: May cause eye irritation.
- **Symptoms/injuries after ingestion**: Ingestion generally causes purging of the bowels. Swallowing large amounts may cause bowel obstruction.

Likely routes of exposure: dermal; inhalation.

### SECTION 12: Ecological information

#### 12.1. Toxicity
No additional information available

#### 12.2. Persistence and degradability

**Magnesium oxide (1309-48-4)**
Persistence and degradability: Not established.

#### 12.3. Bioaccumulative potential

**Magnesium oxide (1309-48-4)**
Bioaccumulative potential: Not established.

#### 12.4. Mobility in soil
No additional information available

#### 12.5. Other adverse effects

Other information: Avoid release to the environment.

### SECTION 13: Disposal considerations

#### 13.1. Waste treatment methods

- **Waste treatment methods**: Take all necessary measures to avoid accidental discharge of products into drains and waterways due to the rupture of containers or transfer systems. Dispose in a safe manner in accordance with local/national regulations.

- **Waste disposal recommendations**: Dispose in a safe manner in accordance with local/national regulations.

- **Ecology - waste materials**: Avoid release to the environment.

### SECTION 14: Transport information

In accordance with DOT
Not considered a dangerous good for transport regulations

#### Additional information

Other information: No supplementary information available.

#### ADR

Transport document description:

#### Transport by sea
No additional information available

#### Air transport
No additional information available

### SECTION 15: Regulatory information

#### 15.1. US Federal regulations

**Magnesium oxide (1309-48-4)**

- Listed on the United States TSCA (Toxic Substances Control Act) inventory
- SARA Section 311/312 Hazard Classes: Immediate (acute) health hazard
SARA Section 313 - Emission Reporting
This notification must not be detached from this SDS and any copying of the SDS must include this notice, as required by 40CFR part 372: Magnesium oxide is not subject to Form R reporting requirements.

15.2. International regulations

Indication of changes: Original Document.

Data sources:
ACGIH 2000.
RTECS, June 1998.

Abbreviations and acronyms:
ACGIH (American Conference of Government Industrial Hygienists).
ATE: Acute Toxicity Estimate.
CAS (Chemical Abstracts Service) number.
EC50: Environmental Concentration associated with a response by 50% of the test population.
GHS: Globally Harmonized System (of Classification and Labeling) of Chemicals.
LD50: Lethal Dose for 50% of the test population.
OSHA: Occupational Safety & Health Administration.
TSCA: Toxic Substances Control Act.
TWA: Time Weighted Average.

NFPA health hazard: 0 - Exposure under fire conditions would offer no hazard beyond that of ordinary combustible materials.
NFPA fire hazard: 0 - Materials that will not burn.
NFPA reactivity: 0 - Normally stable, even under fire exposure conditions, and are not reactive with water.
