

Neutra 7®

Acid Water Neutralizer

Prevents corrosion in water systems.

Pro Neutra 7 is a proprietary alkaline compound which neutralizes acid water in potable systems and keeps the injection point clean of build-up. This helps eliminate corrosion from piping, pressure tanks, water heaters and fixtures. A Neutra 7 solution injected into a water system will neutralize acid water and prevent corrosion.

Available in 7 lb, 25 lb and 40 lb sizes.

Applications

Acid Water Neutralization: The feed rate depends on the acidity of water. Proper dosage is reached when the pH of the treated water is between 7.0 and 8.0. Follow procedure for injecting soda ash into your water system by the chemical feed pump manufacturer or supplier.

Tannin Water Softener Cleaning: Mix 1 cup of Neutra 7 with 1 quart of water and pour into salt storage tank on a weekly basis.

*Note: Not for use before membrane or iron filter system.

Benefits to the User	Technical Information	Part #	Size	Qty.
<ul style="list-style-type: none"> Keeps injection point clean of build-up Compatible with all major brands of chemical feed pumps Neutralizes acid water with a pH of less than 7.0 Eliminates staining of plumbing fixtures and clothing Composed of NSF materials 	<ul style="list-style-type: none"> Pro Neutra 7 is a white granular powder Store in a cool, dry area, away from acids and lime. When dissolving in water, add water slowly and cautiously while stirring as solution can sometimes get hot. Read relevant MSDS before handling product. Do not mix with other chemicals 	SP47N	7 lb.	4
